

## INSTRUCTIONS FOR CONNECTING TO THE INTERNET

Instructions for connecting to the Internet are intended for Internet users in the following facilities of Student center Rijeka:

- ✓ Student dormitory Ivan Goran Kovačić,
- ✓ Student dormitory Trsat,
- ✓ Restaurants and cafe bars of Students center Rijeka and
- ✓ Cafe bar Akvarij

University computer center (SRCE) made instructions for connecting to the Internet in Croatian and English. You can find said instructions on the website <https://installer.eduroam.hr> and the website of Student center Rijeka.

In all Student center Rijeka and University of Rijeka facilities, connection to the Internet is possible by using the CARNET network. To use CARNET network, you need to have your own valid [AAI@Edu.hr](mailto:AAI@Edu.hr) user account. The network which you can use is called **eduroam**.

To connect to the Internet, users (students, employees and others) should have a valid [AAI@Edu.hr](mailto:AAI@Edu.hr) user account issued by their main institution (for example faculty). It is also possible to use an AAI@Edu.hr user account issued by an institution in a foreign country through the eduroam system.

These instructions were made by the IT staff of Student center Rijeka in order to help users to connect to eduroam. In case of technical or any other issues in Student dormitory Ivan Goran Kovačić and Student dormitory Trsat, please contact the reception staff. They will contact the IT staff of Student center Rijeka. In case of technical or any other issues with the Internet connection in other facilities, please contact their IT staff.

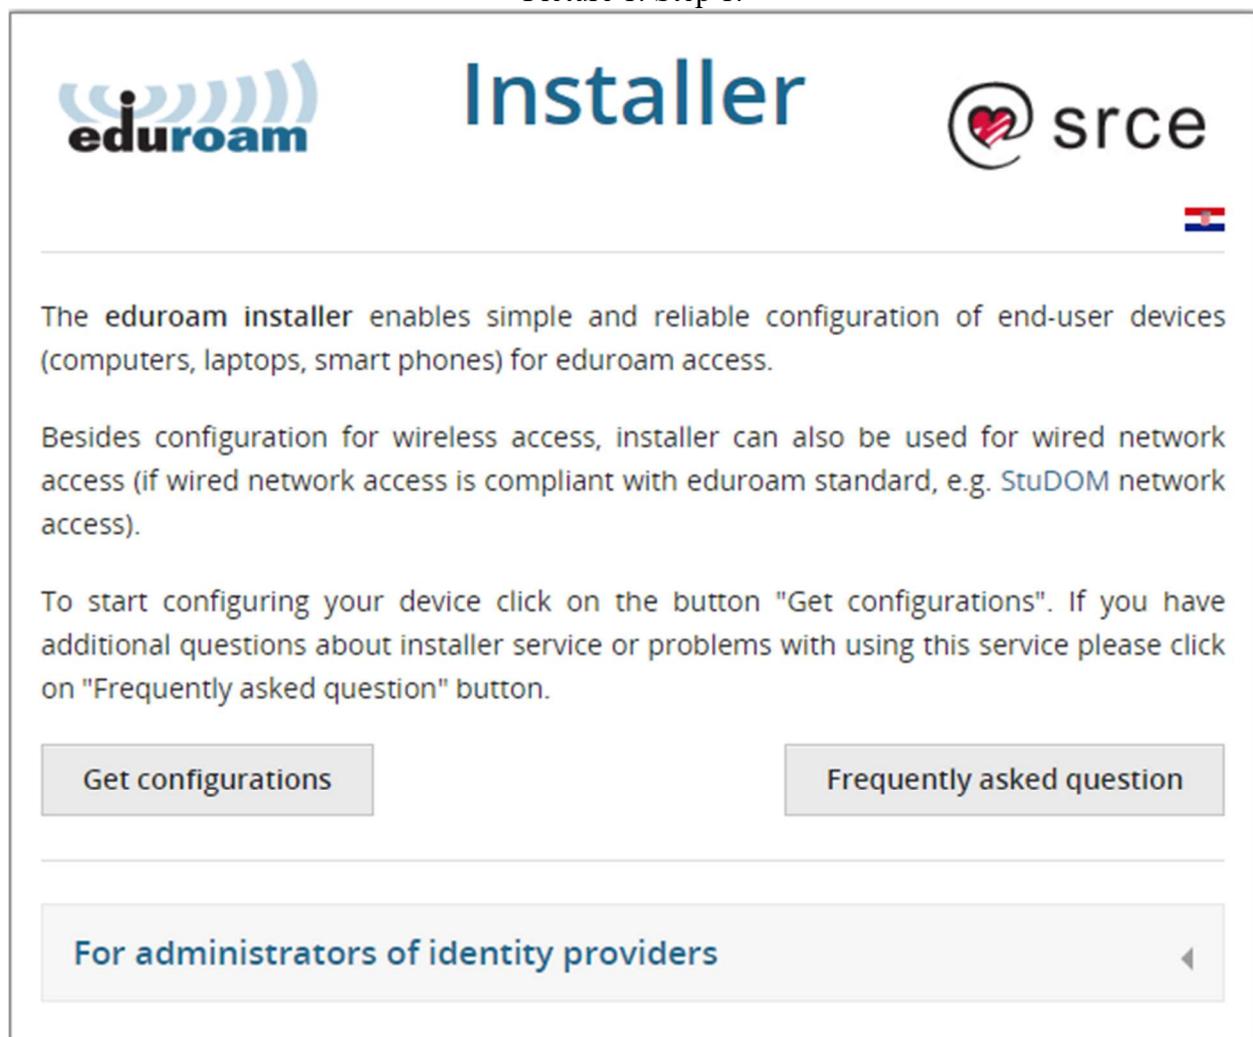

## HOW TO CONNECT TO EDUROAM NETWORK

### Step 1.

Every user must have their own AAI@EduHr user account issued by their main institution (for example faculty).

To connect to the Internet, you must visit the official eduroam installer on the link: <https://installer.eduroam.hr/> and click on *Get configurations*.

Picture 1. Step 1.

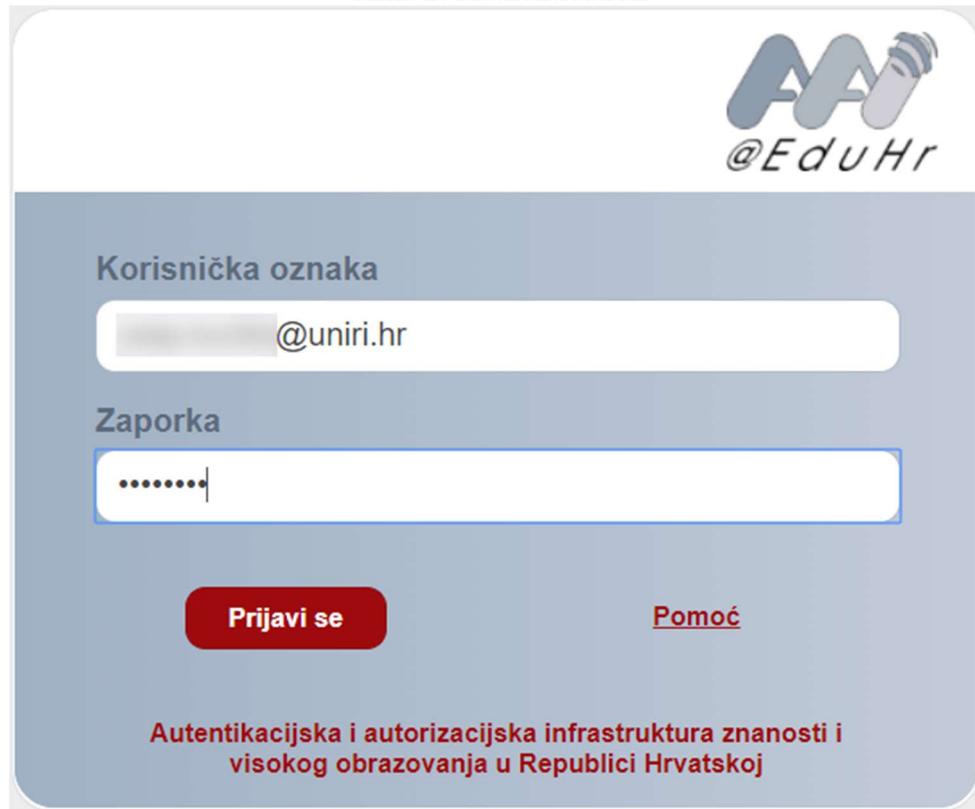

The screenshot shows the homepage of the eduroam installer. At the top, there are three logos: the eduroam logo (a stylized 'e' with signal waves), the word 'Installer' in a large blue font, and the srce logo (a red heart inside a circle) with the text 'srce' and a small Croatian flag to its right. Below the logos, there is a horizontal line. The main content area contains three paragraphs of text. The first paragraph states that the eduroam installer enables simple and reliable configuration of end-user devices (computers, laptops, smart phones) for eduroam access. The second paragraph explains that besides configuration for wireless access, the installer can also be used for wired network access (if compliant with eduroam standard, e.g. StuDOM network access). The third paragraph instructs users to click on the 'Get configurations' button to start configuring their device, and to click on the 'Frequently asked question' button for additional questions. At the bottom of the page, there are two buttons: 'Get configurations' on the left and 'Frequently asked question' on the right. Below these buttons, there is a large light gray box with the text 'For administrators of identity providers' and a small left-pointing arrow.

## Step 2.

The next step is authenticating via user name (korisnička oznaka) and password (zaporka). After logging in, you need to click *Prijavi se*.

Slika 2. Authentication

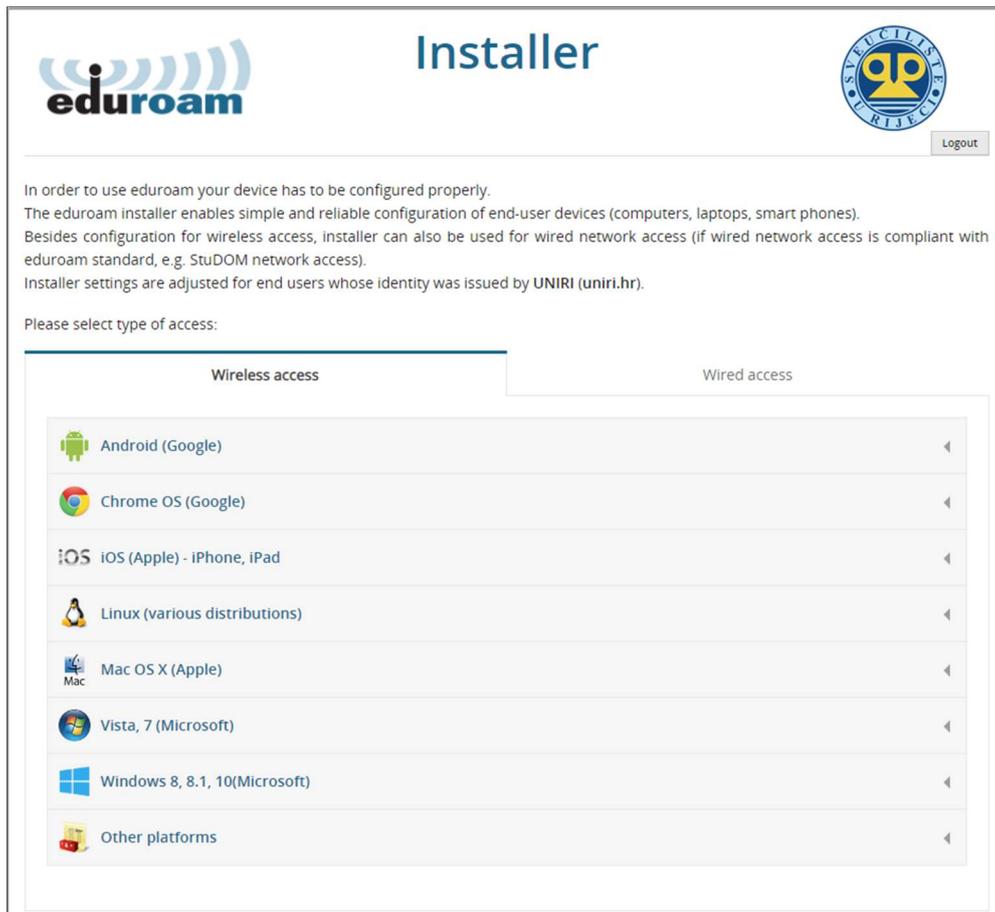

The screenshot shows a login interface with the following elements:

- Logo in the top right corner: "AA @EduHr" with a stylized "AA" and a graduation cap icon.
- Label "Korisnička oznaka" above a text input field containing "@uniri.hr".
- Label "Zaporka" above a password input field containing seven dots.
- A red button labeled "Prijavi se" (Login).
- A red link labeled "Pomoć" (Help).
- Footer text: "Autentikacijska i autorizacijska infrastruktura znanosti i visokog obrazovanja u Republici Hrvatskoj".

## Step 3.

After authentication, the user needs to choose the type of connection (wired or wireless access) and operating system which will be used on the computer.

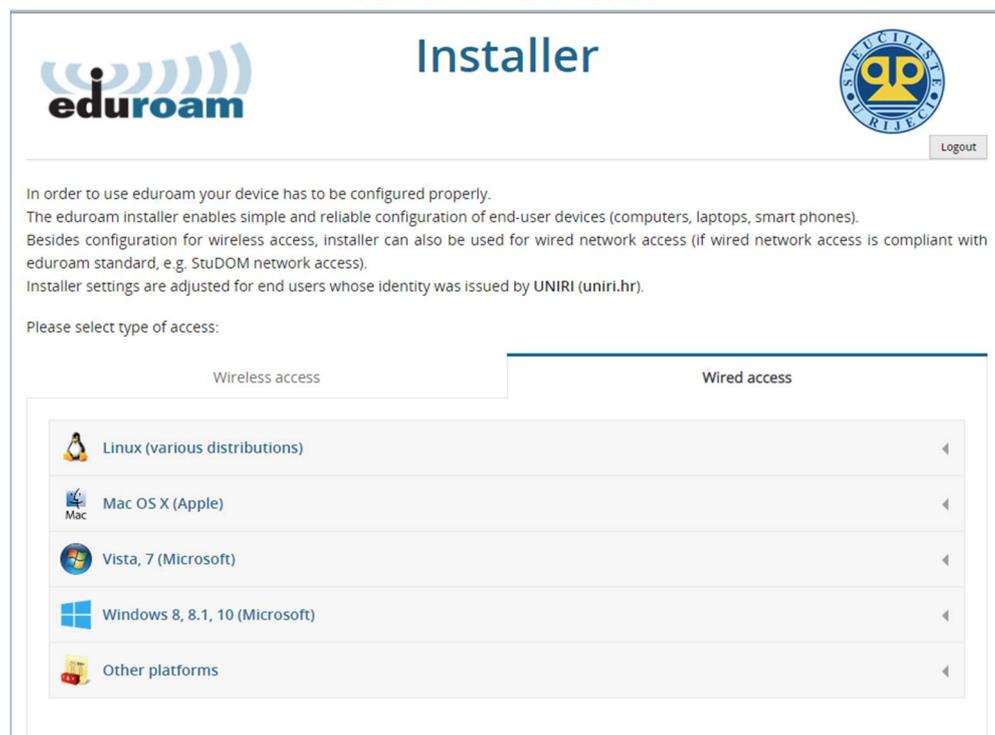

Picture 3. Wireless access

The screenshot shows the 'eduroam Installer' web interface. At the top left is the eduroam logo, and at the top right is the University of Rijeka logo with a 'Logout' button. Below the logos, there is a paragraph of text explaining the installer's purpose and configuration options. A tabbed interface is shown with 'Wireless access' selected. The list of operating systems includes:

- Android (Google)
- Chrome OS (Google)
- iOS (Apple) - iPhone, iPad
- Linux (various distributions)
- Mac OS X (Apple)
- Vista, 7 (Microsoft)
- Windows 8, 8.1, 10 (Microsoft)
- Other platforms

Picture 4. Wired access

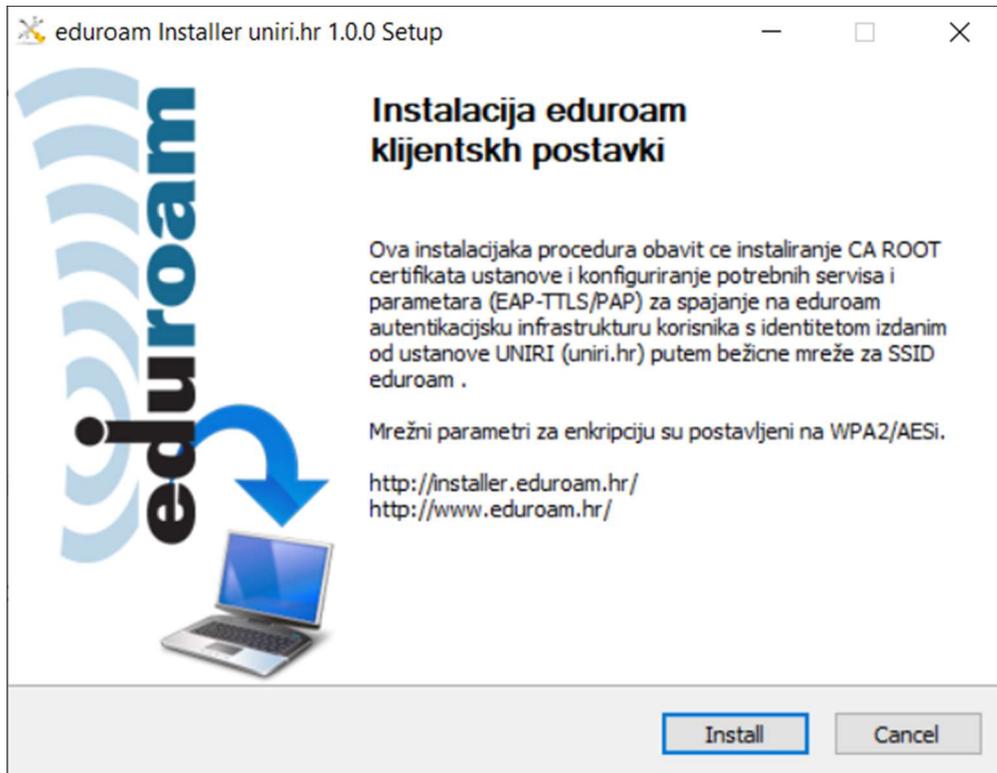

The screenshot shows the 'eduroam Installer' web interface. At the top left is the eduroam logo, and at the top right is the University of Rijeka logo with a 'Logout' button. Below the logos, there is a paragraph of text explaining the installer's purpose and configuration options. A tabbed interface is shown with 'Wired access' selected. The list of operating systems includes:

- Linux (various distributions)
- Mac OS X (Apple)
- Vista, 7 (Microsoft)
- Windows 8, 8.1, 10 (Microsoft)
- Other platforms

## Step 4.

After the type of connection and operating system was selected, the next step is to start installation of eduroam installer application and to click on *Install*.

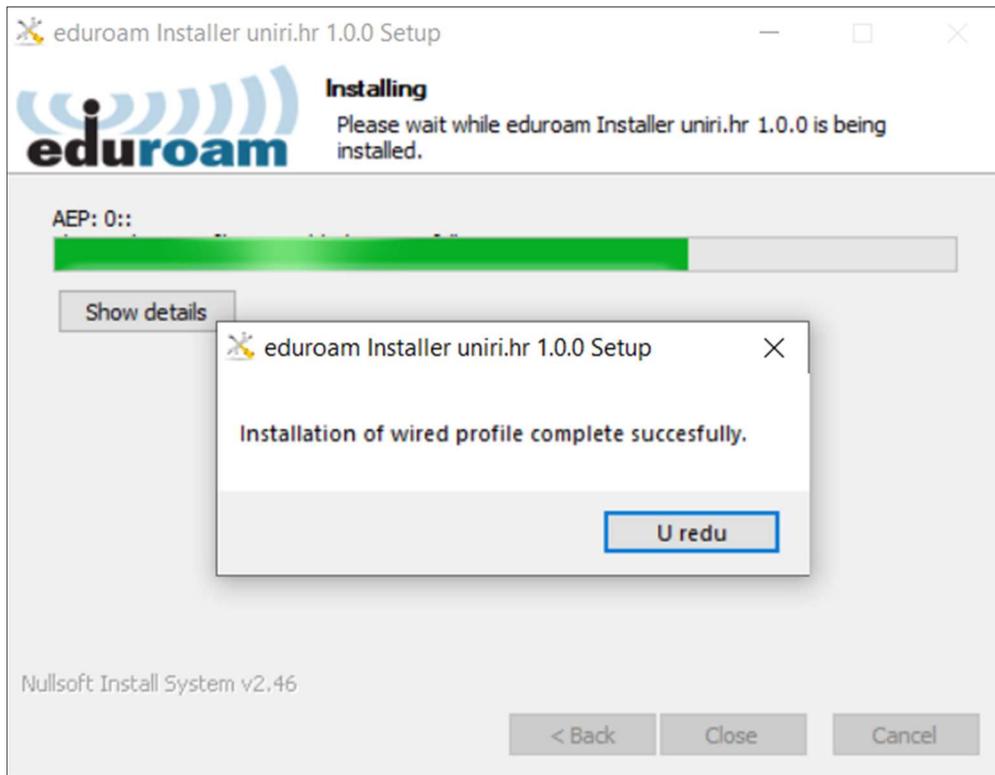

Slika 5. Installation

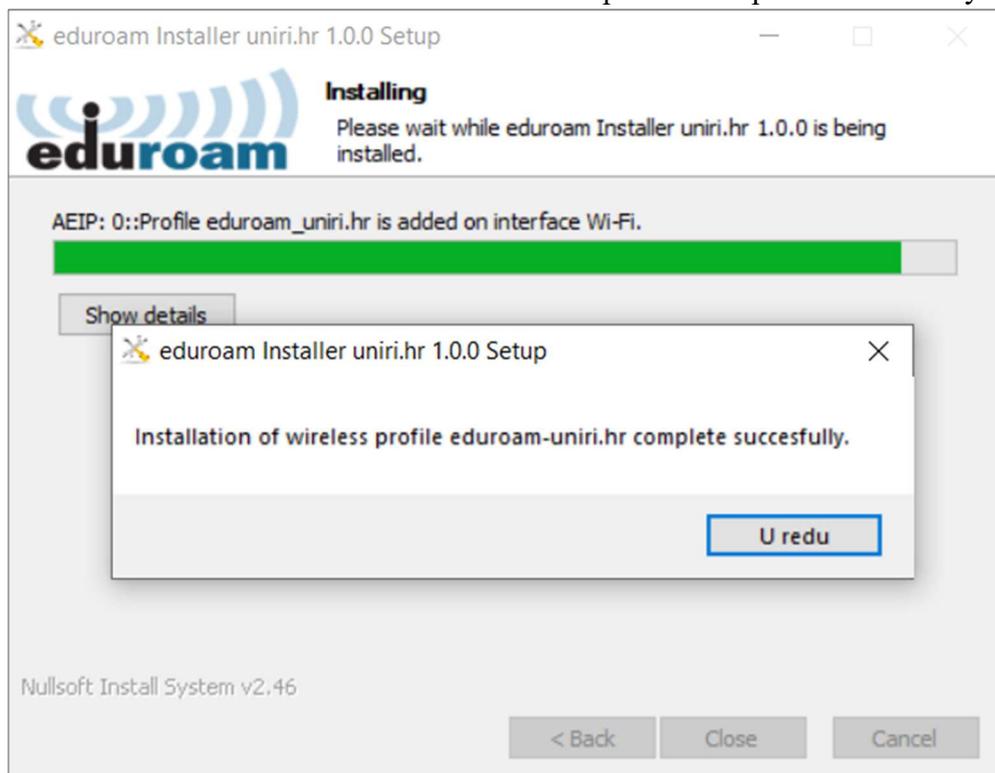

## Step 5.

The user will get feedback on whether the installation of the eduroam installer application was successful.

Picture 6. Feedback: installation of wired profile complete successfully

Picture 7. Feedback: installation of wireless profile complete successfully

## Step 6.

After installation (of wired or wireless profile) is successfully completed, the user should click on *Close*. After the installation is complete, the user should be able to use the Internet.
